Advertising -- ScienceDaily

The first and most obvious case for using a black box is when the cost of a wrong answer is low relative to the value of a correct answer. Targeted advertising is the canonical example. From the vendor's point of view, the cost of posting an unwanted ad is small, whereas the benefit of a successful ad is potentially large ([7][7]).

In defense of the black box | Science

Ads related to politics or issues of national importance. The authorization process for advertisers running ads related to politics or issues of national importance is gradually rolling out in several countries. Learn more about the availability of the ad authorization process in your country.
