A research problem is a definite or clear expression [statement] about an area of concern, a condition to be improved upon, a difficulty to be eliminated, or a troubling question that exists in scholarly literature, in theory, or within existing practice that points to a need for meaningful understanding and deliberate investigation.

Organizing Your Social Sciences Research Paper: The ...

A research problem is the main organizing principle guiding the analysis of your paper. The problem under investigation offers us an occasion for writing and a focus that governs what we want to say. It represents the core subject matter of scholarly communication, and the means by which we arrive at other topics of conversations and the discovery of new knowledge and understanding.

Organizing Your Social Sciences Research Paper: 1 ...

The concept of a last universal common ancestor of all cells (LUCA, or the progenote) is central to the study of early evolution and life's origin, yet information about how and where LUCA lived ...

1.2. Smoking Cessation A Meta-Analytic Comparison of the Effectiveness of Smoking Cessation Methods. Results: They found that among of all of the techniques used, hypnosis was the most effective. They found that a single session of hypnosis was three times more effective than the nicotine gum and five times more effective than willpower alone (willpower was 6%; nicotine gum was 10% and a ...

Hypnosis for Common Medical Issues - White Paper

Life is a characteristic that distinguishes physical entities that have biological processes, such as signaling and self-sustaining processes, from those that do not, either because such functions have ceased (they have died), or because they never had such functions and are classified as inanimate. Various forms of life exist, such as plants, animals, fungi, protists, archaea, and bacteria.

article highlights. This article accompanies a companion article by the same author, "What is the Last Universal Common Ancestor (LUCA)? Looking down a microscope at a human cell, there is not a lot that it seems to share in common with a bacterial cell.

ActionBioscience - promoting bioscience literacy

Biology is the natural science that studies life and living organisms, including their physical structure, chemical processes, molecular interactions, physiological mechanisms, development and evolution. Despite the complexity of the science, there are certain unifying concepts that consolidate it into a single, coherent field. Biology recognizes the cell as the basic unit of life, genes as ...
