Precognition (from the Latin prae-, "before" and cognitio, "acquiring knowledge"), also called prescience, future vision, future sight is a claimed psychic ability to see events in the future.. As with other forms of extrasensory perception, there is no accepted scientific evidence that precognition is a real phenomenon and it is widely considered to be pseudoscience.

Problem-based learning (PBL) is a student-centered pedagogy in which students learn about a subject through the experience of solving an open-ended problem found in trigger material. The PBL process does not focus on problem solving with a defined solution, but it allows for the development of other desirable skills and attributes. This includes knowledge acquisition, enhanced group ...

SANE 2018 - Speech and Audio in the Northeast

Motivational dynamics have changed dramatically to reflect new work requirements and changed worker expectations. One of the biggest changes has been the rise in importance of psychic, or intrinsic rewards, and the decline of material or extrinsic rewards. This author draws upon recent research to ...
